THE SPECTACULAR 22 Karat Solid Gold Five Pound Brilliant Uncirculated Coin

For the first time in more than 80 years, the British Royal Mint has issued non-proof *legal tender* gold five pound coins for collectors. Indeed, the brilliant uncirculated coins which are now available to collectors are significantly superior in their appearance to the circulating coins which were issued in 1887, 1893 and 1902.

The 1984 Gold £5 Brilliant Uncirculated Coins have been produced to the exacting standards that have made British Royal Mint coins amongst the most highly respected in the world. Their surface finish has been protected by sealing them as soon as possible after striking in individual see-through collector cards. These cards, in distinctive black and gold, enable both the obverse and reverse to be examined without danger of the coin surface being marked by dust or fingerprints and also give details of the coin's diameter and weight.

Legal tender

Unlike some gold pieces currently being offered for sale by other countries, the United Kingdom Brilliant Uncirculated Gold Five Pound Coins are legal tender, their designs authorised by Royal Proclamation. This is of particular significance to many collectors.

Quality symbol

The special character of the new Brilliant Uncirculated Gold Five Pound Coin is further emphasied and enhanced by the fact that it bears on the reverse a new Quality Symbol "Ⓤ".

This "Ⓤ" mark is your assurance that the coin is, indeed, classified by the British Royal Mint as a 'Brilliant Uncirculated' legal tender coin.

This is the first time ever that any British coin has borne a distinguishing mark to indicate the quality of the striking. This will certainly be of tremendous interest to collectors.

Low issue limit

A worldwide minting limit of ONLY 25,000 coins has been set for the 1984-dated issue and the allocation to North America is much less than this.

Not only are the 1984 Brilliant Uncirculated United Kingdom Gold Five Pound coins desirable because of their quality and uniqueness, they are also very attractively priced. The coin weighs 39.9 grammes in solid 22 karat gold and contains 1.177 oz of fine gold.

Superlative quality

Those collectors who have purchased British Royal Mint proof gold coins will already be aware of the superlative quality of these special issues. Proof coins (which are identified by their frosted designs and mirror-like 'table') are the ultimate achievement of the minter's art. They are individually struck from specially prepared planchets, using highly polished dies, and are subject to meticulous inspection. A high proportion fail to qualify for issue and are melted down.

Brilliant Uncirculated Gold Five Pound coins do not have the frosted design and mirror background and are struck at a faster rate. Costs of production are consequently much lower and these savings have been passed on to the collector.

1984, The last year of issue of the A. Machin portrait of H.M. Queen Elizabeth II

The 1985 Solid 22K Gold Proof Set from the British Royal Mint

1,000 Years of Tradition

The British Royal Mint has an unparallel pedigree; it's probably the oldest operating official government mint in the world.

The mint struck the first gold sovereign in the 15th century, during the reign of Henry VII. The half-sovereign followed during the reign of Henry VIII, but the £5 coin did not appear until 1823. Today, as then, they remain among the rarest and most prized of all British coins.

Now, in 1985, the British Royal Mint has produced a 4 coin set featuring the huge 5 Pound coin (5 sovereigns) and the 2 Pound (2 sovereigns). The internationally respected sovereign and half sovereign complete this magnificent set. Last year, a 3 coin set was issued.

These are the only legal tender proof coins struck this year, in solid 22K gold.

Opportunity

We see an immediate opportunity developing. A very limited number of proof gold sets and sovereigns are being issued this year.

Only 12,500 proof sets will be struck for 1985, plus 12,500 proof sovereigns and half-sovereigns.

That's worldwide! An astonishingly low mintage for the popular and respected British gold proof coins.

Proof Quality - The Best There Is

Proof coins represent the finest achievement of the Minter's art and are considered to be among the most beautiful in the world. Each coin is struck at least twice, using special highly polished dies. Even the smallest detail of the raised and frosted design is crystal clear against the brilliantly polished background. As each proof coin is solid 22K gold, the result is magnificent.

Superb Potential - Excellent Value

These British Gold Proof specimens reflect superior quality and value in every way. At only $1,395 the Royal Mint's official issue price, plus a small shipping charge (Please add $5 shipping & handling charge per order), the four coin gold proof set is a noteworthy value. You can order the proof sovereign and half-sovereign individually.

The 1985 British Proof Set

The 1985 British Proof Set which is now available, is certain to attract great interest. For the very first time the set contains the full range of British coins bearing the new effigy of HM Queen Elizabeth II, designed by Raphael Maklouf. A change of effigy is a very rare event in the reign of a British monarch, and the new Maklouf design is only the third since Queen Elizabeth was crowned in 1953.

The set also includes another 'first' . . . the one pound coin bearing the second of four variations of design, the Welsh leek. The leek has been adopted by the Welsh as a national emblem, commemorating the time when St. David, Patron Saint of Wales, persuaded his countrymen to wear leeks in their caps to distinguish themselves from their enemies at a battle, in 633 AD, from which they emerged victorious. The coin bears a distinctive Welsh inscription *'Pleidiol wyf I'm Gwald,'* 'True am I to my country.'

The set is available in an attractive wallet, either in blue leatherette or in superb red leather. Only 125,000 will be available throughout the world and demand has already been heavy for the much smaller quantity allocated to Northern America.

The 1985 Brilliant Uncirculated Collection

Also recently released is this beautiful collection of carefully chosen circulating coins which receive special handling to preserve their Mint condition. While they are of excellent quality, they have been struck only once, and do not have the frosted reliefs or quite the same fine detail as proof coins. In all other respects, however, they are identical to the proof coin . . . with the same designs, metal content and face value.

The 1985 BU collection is presented in a handsome commemorative folder, which contains an interesting and informative commentary on the new Royal Portrait and the design of the new Welsh pound. It is an excellent educational gift for children or friends, and a meaningful commemorative in its own right . . . a collection that will recall for years to come the start of a new era in British coinage.

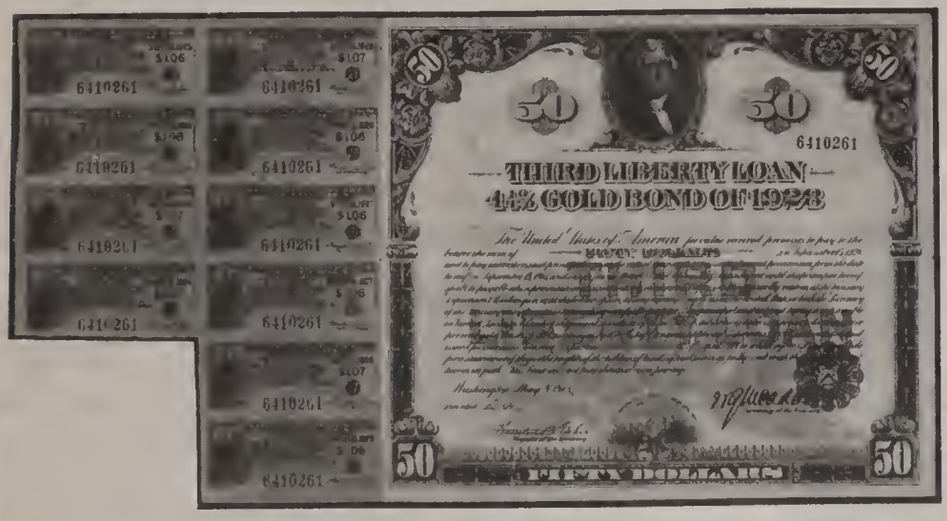
A BEAUTIFUL UNITED STATES 4¼% GOLD BOND OF 1928



This is a rare item and one of the hottest collectibles in the U.S. Currency market right now. Prices were extremely strong at the recent Memphis Currency Auction and with the coming release of a new reference work on these, prices are sure to sky-rocket.
The majority of these beautifully engraved bonds were redeemed since $50 was quite a bit of money in the 20's. As a result, very few survived much less with coupons attached! These 13-1/2" X 7-1/8" bonds are quite a sight to behold with blue seal and serial numbers, pink numerals and coupon underprinting, black border engraving and brown reverse engraving – truly spectacular. This is the first one of these we have ever handled and may be the last. Don't miss this opportunity $650.00

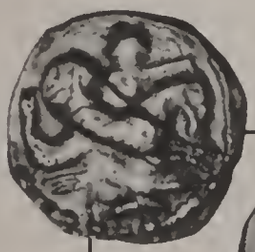
Shekels of the Old Testament of Tyre



Phoenicia, Tyre, 360-332 B.C. Silver Didrachm or heavy (1-1/3) Shekel. Melqarth riding right on hippocamp holding bow; beneath, waves. Reverse: Owl standing to right with crook and flail under left wing; date in Phoenician numerals in field [⌒ = 10, 1 = 1]. Sear 5914, 5915.

Tyre was an ancient colony of Sidon which, by the time these coins were struck, surpassed Sidon in terms of wealth. The economy was derived from the sea: purple murex dye (the mythical discoverer of the dye was Melqarth portrayed on the obverse) and commerce. While the usual description of the reverse type is standing, it is possible that a hawk of Egyptian origin is represented connotating royal power, as at this time dynasts ruled Tyre. Originally the name Tyre is derived from the Greek word for rock. While Tyre is today a peninsula, in ancient times Tyre was an island which was dominated by a magnificent temple dedicated to Melqarth. Hiram the master architect of King Solomon, was from Tyre, the principal and capital city of Phoenicia.

Tyre is mentioned often in the Bible and it is with pleasure that we offer these important Biblical coins which are in much better than normally seen condition. Our coins were carefully selected from a recent small hoard (only 50 pieces) and show little actual wear. The normal fair market retail value of this rare silver didrachm is priced from $500 to $750 each (if ever offered at all).

We are proud to offer select, conservatively graded Choice Very Fine specimens. Take advantage of the bargain price of only $395.00 each.

Strike now while the opportunity exists! Once these handful of beauties are sold, there are no more!

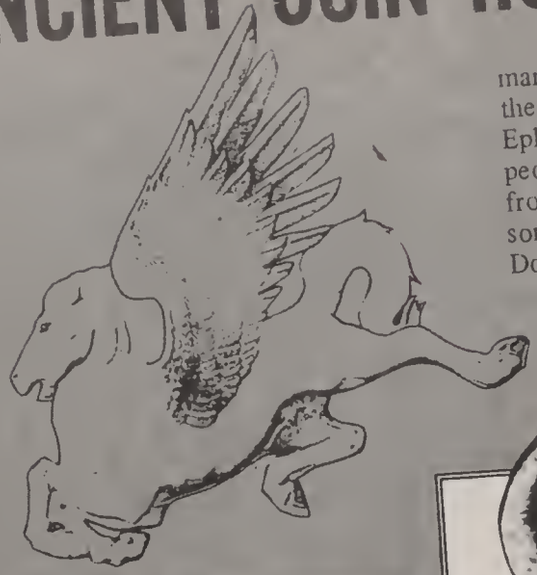
ANCIENT COIN HOARDS



We are pleased to offer recently excavated coins from many ancient sites selected for their condition as well as for their historical importance. The mention of towns like Ephesus and Tarsus evoke a certain excitement in many people – it is a great thrill to behold numismatic treasures from these places. Our first listed hoard might remind some of the movie with Sophia Loren – "The Boy on the Dolphin."

HOARD I

"BOY ON THE DOLPHIN" TYPE SILVER DIDRACHMS (Staters) OF TARTENTUM

Struck mid 3rd Century B.C., these silver didrachms (or "nomoi" as they were called) exhibit a horseman in various attitudes on the obverse while the reverse is devoted to the portrayal of Taras, the legendary founder of Tarentum (now Taranto in Italy), riding a dolphin. Taras was saved from a shipwreck by his father Poseidon, who sent a dolphin to save him. He was carried by the dolphin to a beautiful shore with protected harbor and there he founded Tarentum, famous for its numerous types of shellfish and murex. The city flourished and soon became the most powerful in all of Magna Graecia. Taras, the city name as it was called by the Greeks, became a Roman colony after 207 B.C. and subsequently declined in prosperity. HOARD II

PAEONIA HOARD SILVER TETRADRACHMS

The Kingdom of Paeonia became independent following the death of Perdikkas III of Macedon in 359 B.C. For the next seventy years the various kings issued coinage, mainly in tetradrachm size; these coins were later imitated by the Celtic tribes. These tetradrachms come from a region known in ancient geography as Paeonia, a land lying on the northern borders of Macedonia between the river Strymon and the river Axius. Very few historical facts are known about Paeonia, and although both Philip II and Alexander III, the architects of Macedon's greatness, led expeditions into the region, there can be little doubt that the hardy inhabitants of this rather inhospitable tract enjoyed a considerable independence, taking advantage of political confusions at the centres of Macedonian power to stir up trouble for the royal house of Macedon. The mountain ranges in the region, especially the Pangaean range in lower Macedon abounded with rich veins of gold and silver which had been worked by local tribesmen for some time: ready access to the materials for coinage coupled with military endeavours of great magnitude calling for large payments to troops and bribery payments to would-be hostile tribes account for the big issues of coins in this period.

The histories of the kings of Paeonia are lost in antiquity. Lykkeios (circa 359-340 B.C.) is known, apart from his extremely rare coins, for his participation in military alliances against Philip II of Macedon: the Paeonian cavalry of Patraos (circa 340-315 B.C.) played an important part in the Persian campaigns of Alexander III, although these were mercenary soldiers, and not led by their king.

The Choice VF examples we offer were issued under King Patraos, circa 340-315 B.C., and display the laureate head of Apollo right / armed warrior on horse prancing right, spearing fallen enemy.
Normal retail is $350.00- 450.00 each. **ORDER NO. 03-359**

Choice VF $250.00

Nearly all the known pieces of this type come from the famous "Paeonian Hoard" uncovered in the mid 1960's and sold thru Sotheby and Co. London on Wednesday, April 16, 1969. These coins of course, trace their pedigree to that sale.

HOARD III

LARISSA SILVER DRACHMS

Larissa was the most important town in Thessaly and issued some of the most beautiful of all Greek coins. These silver drachms, minted 350-325 B.C., portray the facing head of the nymph Larissa while the reverse type is a horse, usually grazing. A facing head coin type is said to be the most difficult of all to engrave artistically in the die, mainly because of the necessary modeling for the curved relief. These coins represent the finest period of ancient Greek art. All are attractive Fine – VF on somewhat porous flans. Normal retail is $250- 350 each $175.00

The emperor Claudius combined Lycia and Pamphylia into a Roman province in A.D. 43, suspending their independent coinage. Obverse has the head of Apollo / lyre within incuse square. HOARD IV

EPHESUS SILVER TETRADRACHMS

The site of the celebrated Temple of Artemis, an ancient wonder of the world of which nothing remains except traces of its foundation – the city which was so important in the history of the early Christian Church of Saint Paul and Saint John – this is the minting place of the coins we now offer. Struck 390-330 B.C., a bee is represented on the obverse while the forepart of a kneeling stag with palm tree behind dominates the reverse. The bee and the stag are symbols from the worship of the Ephesian Artemis. This coin catalogues £500 in David Sear's book on Ancient Greek Coins. S-4371-4373. Avg VG-F example w/ some porosity.

The obverses are commonly weakly struck, but the condition of our specimen is otherwise EF with light porosity $297.50

HOARD V

FRACTIONAL SILVER OF MILETOS IN IONIA

Miletos, one of the most important cities in Asia Minor, was also one of the very first cities to issue coinage. While the actual dating of these crude, punch-marked coins is still being debated by scholars, the earliest coins were minted of electrum, a native mixture of silver and gold, found in the stream-beds of this region. The deeply struck incuses were designed for the visual examination of the purity of metal – to look "inside" the coin. The specimens we have from Miletos were struck much later, during the 2nd Century B.C., and have the laureate head of Apollo / Lion. These are reduced size drachms (or tetrobols), in pleasing Fine condition (normal retail is $100- 150 ea.) $57.50

SILVERED ANTONINIANI OF DIOCLETIAN

Minted in the east by Diocletian (Roman emperor, A.D. 284-305), antoniniani are usually found with their thin silver wash gone; these are a happy exception, with each coin displaying most of its original silvering (over bronze core). These sheets of 60 multicolor seals are the real thing and were printed in England back in 1937 (or was it '36). Pictured are "pictures" from what appears to be the royal family photo album. It really is a trip down memory lane. Everyone looks so young and "noble." Just think what has happened to the world since then. Your memories alone make this a bargain at

A random sample produces many notes that catalog over $5 each! The CU lots are just that. All notes are CU and if at all possible there will be little if no duplication. Our last ad sold out in a hurry, so don't wait to order.

OFFICIAL 1981 Reagan Bronze 2-1/2" Inaugural Medal

We have had tremendous demand for this medal and none have been available. The reason for its popularity is simply because the 1981 issue prices were so high that collectors simply did not buy the precious metal issues and only purchased these 2½" versions struck in bronze. Now these have been long sold and demand continues especially since few of the precious metal versions were struck and those have begun to climb in price. You can obtain this rare antiqued bronze official medal struck by Medallic Art Co. of Danbury Conn. at just $25.00. We have just a couple dozen pieces so act promptly to avoid disappointment.
